

Capability Statement

Who We Are

CLP was established more than 20 years ago to design, manufacture and distribute specialist tools and equipment for the cable laying industry. From our factory located in Acacia Ridge, we service clients throughout Australia, New Zealand and the Pacific.

We are passionate believers in the capability of local manufacturing. While we acknowledge there are economies of scale to be achieved through large production runs in offshore factories, there is still a place for specialist manufacturers here in Australia. Rather than look offshore for product, we have adopted a philosophy of continuous improvement and Lean processes to ensure that we remain competitive for the small batch quantities local markets often require.

What We Do

We have continued to develop and refine our processes over the last 20 years and can now offer the benefits of that experience to a wide range of industries.

Manufacturing and assembling light steel equipment and components is now a core skill that enables us to produce high quality products at competitive prices. Our systems and capabilities are world class for smaller quantities of product that cannot be economically or efficiently sourced offshore.

Our Capability

We offer a complete service that includes:

- Engineering and design
- Welding
- Bending
- Laser cutting
- Milling
- Turning
- Tapping
- Zinc plating and powder coating
- Assembly

Our Approach to Business

CLP has an absolute commitment to customer service, which is reflected in the culture of our team. Our aim is to ensure that we achieve a continuous and high level of customer satisfaction.

We operate to strict quality assurance standards and our customers tell us that our products are clearly the best available. We are also uncompromising in our approach to safety.

Our business processes are responsive and flexible. Our aim is to always do whatever we can to accommodate our customers' needs.

Why Deal With Us

CLP can locally manufacture light steel products in quantities that cannot be sourced offshore. You will benefit from our competitive prices, superior quality and expert service. We will respond quickly to your needs so you're never limited to choosing between slow response times or high inventory levels and there is no need to second-guess currency movements.

We will provide you with an end result that exceeds the benefits of offshore sourcing and eliminates the problems.
